LEAK REPAIR

PRESSURIZED

Ultra Kit - Quick Repair Kit for Active Pipe Leaks

- No shutdown required
- Repairs leak in 30 minutes
- Repairs under active leak up to 150 psi (11kg/cm²) pressure
- Applicable to pipes up to 18" (457 mm)
- Withstand pressure up to 500 psi (35 kg/cm²)
- Withstand temperature up to 392°F (200°C)
- Calculated under ASME PCC2

1 roll of Fiberglas Tape
1 roll of Self Fusing Tape
1 unit of Epoxi Stick Quick Cure
1 pair of latex gloves

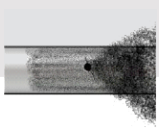

BANDAGE SIZE	2"x12' 50mm x 3.6m	4"x12' 100mm x 3.6m	4"x25' 100mm x 7.6m

SURFACE PREPARATION

Minimize the flow rale and reduce system pressure

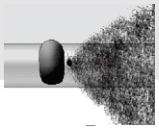

Roughen the area to be repaired

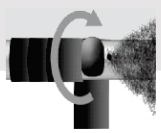

STOP THE LEAK

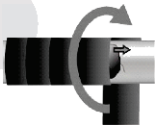

Knead the Epoxy Stick

Place the Epoxy Stick away from the leak location

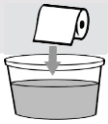

Start wrapping the Self Fusing Tape a few distance away from the leak location

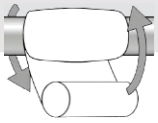

Continue to wrap the Self Fusing Tape onto pipe while pushing the Epoxy Stick onto leak location

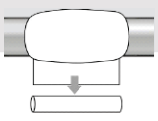

REINFORCE LEAK AREA

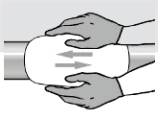

Immerse the Fiberglass Tape into water

Wrap the Fiberglass Tape around the repair area as tightly and evenly as possible, using the entire roll

Discard the plastic tube at the end of the roll

Wet gloves in water and quickly compress the bubbling resins back into the Fiberglass Wrap
